## **Ampack Ammann – a family company with tradition since 1973**

As owner-operated company, Ampack Ammann sets standards in the market for machines for the filling and packaging of highly sensitive food products. At the company headquarters in Königsbrunn – approximately 60 km north-west of Munich – filling and packaging systems are developed and manufactured in a total area of over 14 000 m<sup>2</sup> to meet the most diverse needs of customers around the world.

Responsibility, expertise and intensive personal commitment of the owners and employees have made Ampack Ammann into what it is today: A successful international company with a high degree of innovation, a solution-oriented service provider with a clear customer focus, and a reliable partner for customers, employees and business partners.

The background features a close-up of water ripples in shades of blue and green. Overlaid on the right side is a rectangular inset showing a grid of water droplets on a blue surface, each reflecting a landscape with green hills and a blue sky.

*Succeed with innovation*

*Putting know-how to work*

# *Integrate individuality*

## **Filling systems – precisely customised for customer needs**

The uppermost goal of Ampack Ammann is clearly defined: To meet individual customer's needs using state-of-the-art know-how, technologies and materials. All aspects of aseptic treatment, product safety, performance, efficiency and flexibility ensure Ampack Ammann customers the highest level of cost-effectiveness.

The range of customers is wide: Renowned companies from the milk and food industries depend just as much on Ampack Ammann know-how as specialists from the areas of clinical and baby food. Through an exhaustive exchange of information, a precisely tailored solution is arrived at to meet the respective needs, leading to a reliable and long-lasting collaboration.

## **Flexible service and optimal products for the highest level of customer satisfaction**

Ampack Ammann delivers a vertical integration of over 80 per cent controlled quality. Employees with many years of experience and comprehensive know-how install the systems worldwide, provide careful training to the employees of the customer who will be responsible, and are always available in case of questions concerning service tasks during running production. The machines are designed for demanding operation and intensive continuous use. An intelligent

combination of CRM, ERP, and CAD systems makes it possible to access all machine data at any time in order to guarantee fast, competent service in the case of breakdowns. In addition, Ampack Ammann maintains a replacement parts warehouse with a value of several million euros. The mostly same-day delivery of parts ensures a high level of machine availability for customers.

# *Establish continuity*

*Rely on  
flexibility*

# *Enjoy diversity*

## **Technical flexibility and a wide spectrum of services satisfy every wish**

An extremely wide range of products can be filled using Ampack Ammann systems. Whether pasty, low or high viscosity media, sensitive desserts and toppings, or products containing solids: The Ampack Ammann machine concept and the advanced dosing technology deliver optimal results, short format-change times and the highest degree of hygienic standards for cup and bottle filling.

Additionally, a diverse selection of dosing systems and filling nozzles make possible great flexibility and filling precision in production. Depending on application, the filling machines can be executed in aseptic or ultraclean version as well as with sterile air covering. Also the cup and bottle formats, the design and material can be customised individually.
