21 YEARS OF FIELDBUS TECHNOLOGY

FROM DEUTSCHMANN

250,000 INSTALLATIONS
SPEAK FOR THEMSELVES

PROTOCOL CONVERTER UNIGATE® CL

For all devices with a serial interface.

ALL-IN-ONE BUS NODE UNIGATE® IC

Integrating fieldbus and Ethernet interfaces with
minimal development effort.

THE INTELLIGENT GATEWAY UNIGATE® CX

Making incompatible networks compatible.

WE PROVIDE TURNKEY SOLUTIONS

We may not have invented the wheel – our communications solutions, however, have frequently set the benchmark for the industry.

- 1976 Company foundation
- 1980 Electronic cam controls
- 1989 DICNET, Deutschmann's first own bus system
- 1993 Foundation of the fieldbus technology division
- 1996 First fieldbus gateway
- 1999 Release of the proprietary script language Protocol Developer
- 2001 UNIGATE® IC series
- 2006 Expansion of the Industrial Ethernet portfolio
- 2010 UNIGATE® AS-i Master for all fieldbuses
UNIGATE® IC BACnet/IP
- 2011 UNIGATE® CL and IC BACnet/IP

ONLY THE BEST WORK FOR US!

Because they are enthusiastic, innovative,
competent, and quality-conscious.

rial management

The team

In development, sales, and support, all our experts work towards
one aim: the right solution for your requirements.

We at Deutschmann provide excellent service, and we are always
up for a challenge!

UNIGATE® CL PROTOCOL CONVERTER

UNIGATE® CL ONE SOLUTION FOR ALL DEVICES with a serial interface

UNIGATE® CL protocol converters connect serial interfaces with the fieldbus or Ethernet standard of choice. All models feature RS232, RS485, and RS422 interfaces. They can easily be configured for communication with protocols such as Modbus ASCII, Modbus RTU (Master or Slave), 3964 (R), RK512, DIN measuring bus, and DIN 19244. Alternatively, the terminal device can be addressed via an own script.

For programming the script, we provide the Protocol Developer PC tool free of charge. You can develop it yourself or have us do it for you!

The modules in a modern housing require a 10...33 V DC supply voltage. They are suitable for industrial applications and are specified for the industrial temperature range.

Application side

- Modbus RTU Master/Slave
- Modbus ASCII
- 3964 (R)
- RK512
- DIN 19244
- DIN 66348-2 (measuring bus)
- Proprietary protocols
- Flexible due to a freely programmable script

Bus side

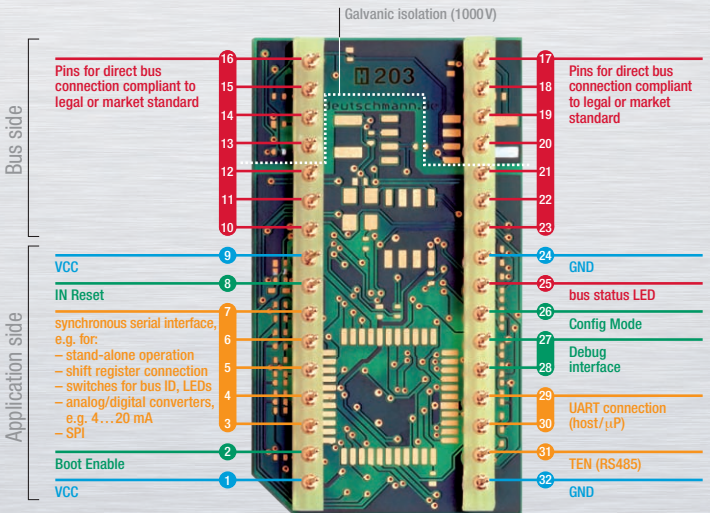

ALL-IN-ONE BUS NODE UNIGATE® IC

UNIGATE® IC INTEGRATING FIELDBUS and Ethernet interfaces with minimal development effort

The UNIGATE® IC series provides ready-to-install fieldbus or Ethernet nodes in a DIL32 housing. Engineers merely have to consider the UNIGATE® IC pinout when developing new devices, or implement it via a redesign. A script converts the terminal device's protocol to the fieldbus or Ethernet standard. Changes to the firmware are no longer necessary.

For programming the script, we provide the Protocol Developer PC tool free of charge. You can develop it yourself or have us do it for you!

ALL-IN-ONE BUS NODE UNIGATE® IC

UNIGATE® CX THE FLEXIBLE SOLUTION making incompatible networks compatible

Various fieldbuses and Industrial Ethernet standards have taken hold in the automation industry the world over. The challenge of connecting these incompatible communication systems remains a big one.

UNIGATE® CX DIN rail modules have been developed precisely for this purpose. The units combine various fieldbus and Industrial Ethernet interfaces. Quasi-uniting two UNIGATE® CL in a modular setup, UNIGATE® CXs are available for any fieldbus/Ethernet combination.

We continuously adapt the Deutschmann product portfolio to current demands, thus ensuring that you will always get the product you require!

Fieldbuses and Industrial Ethernet

EtherCAT®

CANopen

ETHERNET
POWERLINK

ETHERNET TCP/IP MODBUS TCP LONWorks

ELECTRONIC CAM CONTROLS

ELECTRONIC CAM CONTROLS

Even in times of fast PLCs, electronic cam controls remain an essential tool.

- Short, constant cycle times and a high number of outputs
- High maximum load currents of 1 A
- Dynamic idle time compensation
- Logic functionalities

Modern LOCON®- and ROTARNOCK®-type cam controls are way ahead of their competitors in every respect.

Conventional devices:

The LOCON® series is based on the traditional concept of a separate cam control and actual value acquisition. The devices are operated either by means of the integrated keypad or a connected PC, or via a fieldbus system.

Integrated devices:

The ROTARNOCK® series is an intelligent solution combining cam control and actual value acquisition. The devices can be operated via a terminal, a PC, or a fieldbus system.

**VISIONS, COMMUNICATION,
PARTNERSHIP, COMMON GOALS,
CUSTOMER RELATIONS ...**

**WE GROW WITH MARKET DEMANDS
AND WITH OUR CUSTOMERS.**

Support:

You can contact our support team via our free-of-charge hotline or by e-mail.

Workshops:

In workshops about our UNIGATE®-type all-in-one bus nodes, our expert developers will acquaint you with our products and address ways how to easily realize your projects with Deutschmann.

Download area:

Documents and tools for all our products can be downloaded from our website free of charge.

FAQs:

Our website provides the answers to frequently asked questions.

Service:

On request, we support you during commissioning or service calls, or program scripts according to your specifications.
