nocanorm

The nocanorm range includes the hygienic stainless steel components from Nocado, which are well proven for years. It consists of the following product groups:

Valves

- Leakage butterfly valves and butterfly valves
- Ball valves
- Small valves
- Adjustable valves
- Non-return valves
- Angular valves, Y-valves

Installation material

- Tubes and fittings
- Pipe connections
- Tubing supports and hangers, accessories, tools
- Structural tubes, bars and rods

Filters, sight glasses

- Passage and angular filters
- Cross sight glasses/deaeration lanterns

Tank equipment

- Manholes and lids
- Cleaning devices
- Sight glasses, level indicators
- Attachments

Application

The components in the nocanorm range are particularly used in the food and beverage industry. They are also used everywhere, where high-quality and reliable stainless steel fittings are required.

Features

In addition to the usual national and international standards for the food industry, we also manufacture according to the extremely high nocanorm standards.

Design

The fittings are produced using the following materials:

- AISI 304/304 L (corresponding to 1.4301/1.4307)
- AISI 316 L (corresponding to 1.4404/1.4435)
- Sealing materials in Silicone according to FDA directive (also transparent version), NBR, HNBR, EPDM, Viton

The outside surfaces are available:

- Polished
- Matt

nocaplus

In the past years, Nocado has gained numerous new customers by providing solutions for special requirements. The nocaplus line was developed in close cooperation with these customers. Nearly all nocanorm parts are also available in the nocaplus version. nocaplus includes the following product groups:

Installation material

- Tubes
- Fittings
- Pipe connections

Valves

- Butterfly valves
- Double/single-seat valves
- Diaphragm valves
- Sampling devices

Filters, sight glasses

- Passage/angular filters
- Cross sight glasses

Application

The components in the nocaplus range are particularly used in the food, beverage and cosmetics industry. Furthermore, they are also used everywhere, where high quality and reliable stainless steel fittings are required. The compliance with quality criteria is individually controlled and documented.

Features

In addition to the usual national and international standards for the food industry, we also manufacture according to the extremely high nocaplus standards.

Design

The fittings are manufactured using the following material:

- AISI 316L (corresponding to 1.4404/1.4435), special stainless steel or titanium available on request
- Tubes and fittings of annealed material
- Sealing materials in Silicone according to FDA directive (also transparent version), NBR, HNBR, EPDM, Viton

The outside surfaces are available:

- Polished (electro-polished)
- Matt (blasted)
- Other finishes are available on request

Documentation (optional):

- Specific test report 2.2 according to EN 10204
- Inspection certificate 3.1 (3.1.B) according to EN 10204
- For fittings: Operating instructions and spare-parts lists

Quality standards:

- Generally applicable standards
