# BEST OF LOAD HANDLING.

AFB Anlagen- und Filterbau develops and manufactures dynamic intralogistic solutions. Our production of tailor-made lifting devices rests upon the professional knowledge we have gained in over 45 years and our experience with more

than 10.000 customer applications. Our products are designed for transport and transmission systems, they fit different load carriers and environmental conditions. It is our goal to stay very close to our customers and their requests. We adhere to the

highest quality standards, offer our business partners detailed advice, and guarantee quick reactions and flexibility. This is why leading suppliers all over the world trust in our products "MADE IN GERMANY".

# A LOAD MOVING COMPANY.

# EXPERT CONSULTING TO SAVE YOUR RESOURCES.

Our team of experts offers personalized advice when you decide on one of our products for your purposes. We always focus on economic and energy efficiency. Using our experience we can greatly help you with planning a project. We support

you during the development of your concept so you can save precious time and other resources. As your business partner we also provide answers for all questions concerning the maintenance, renewal, and care of loading devices.

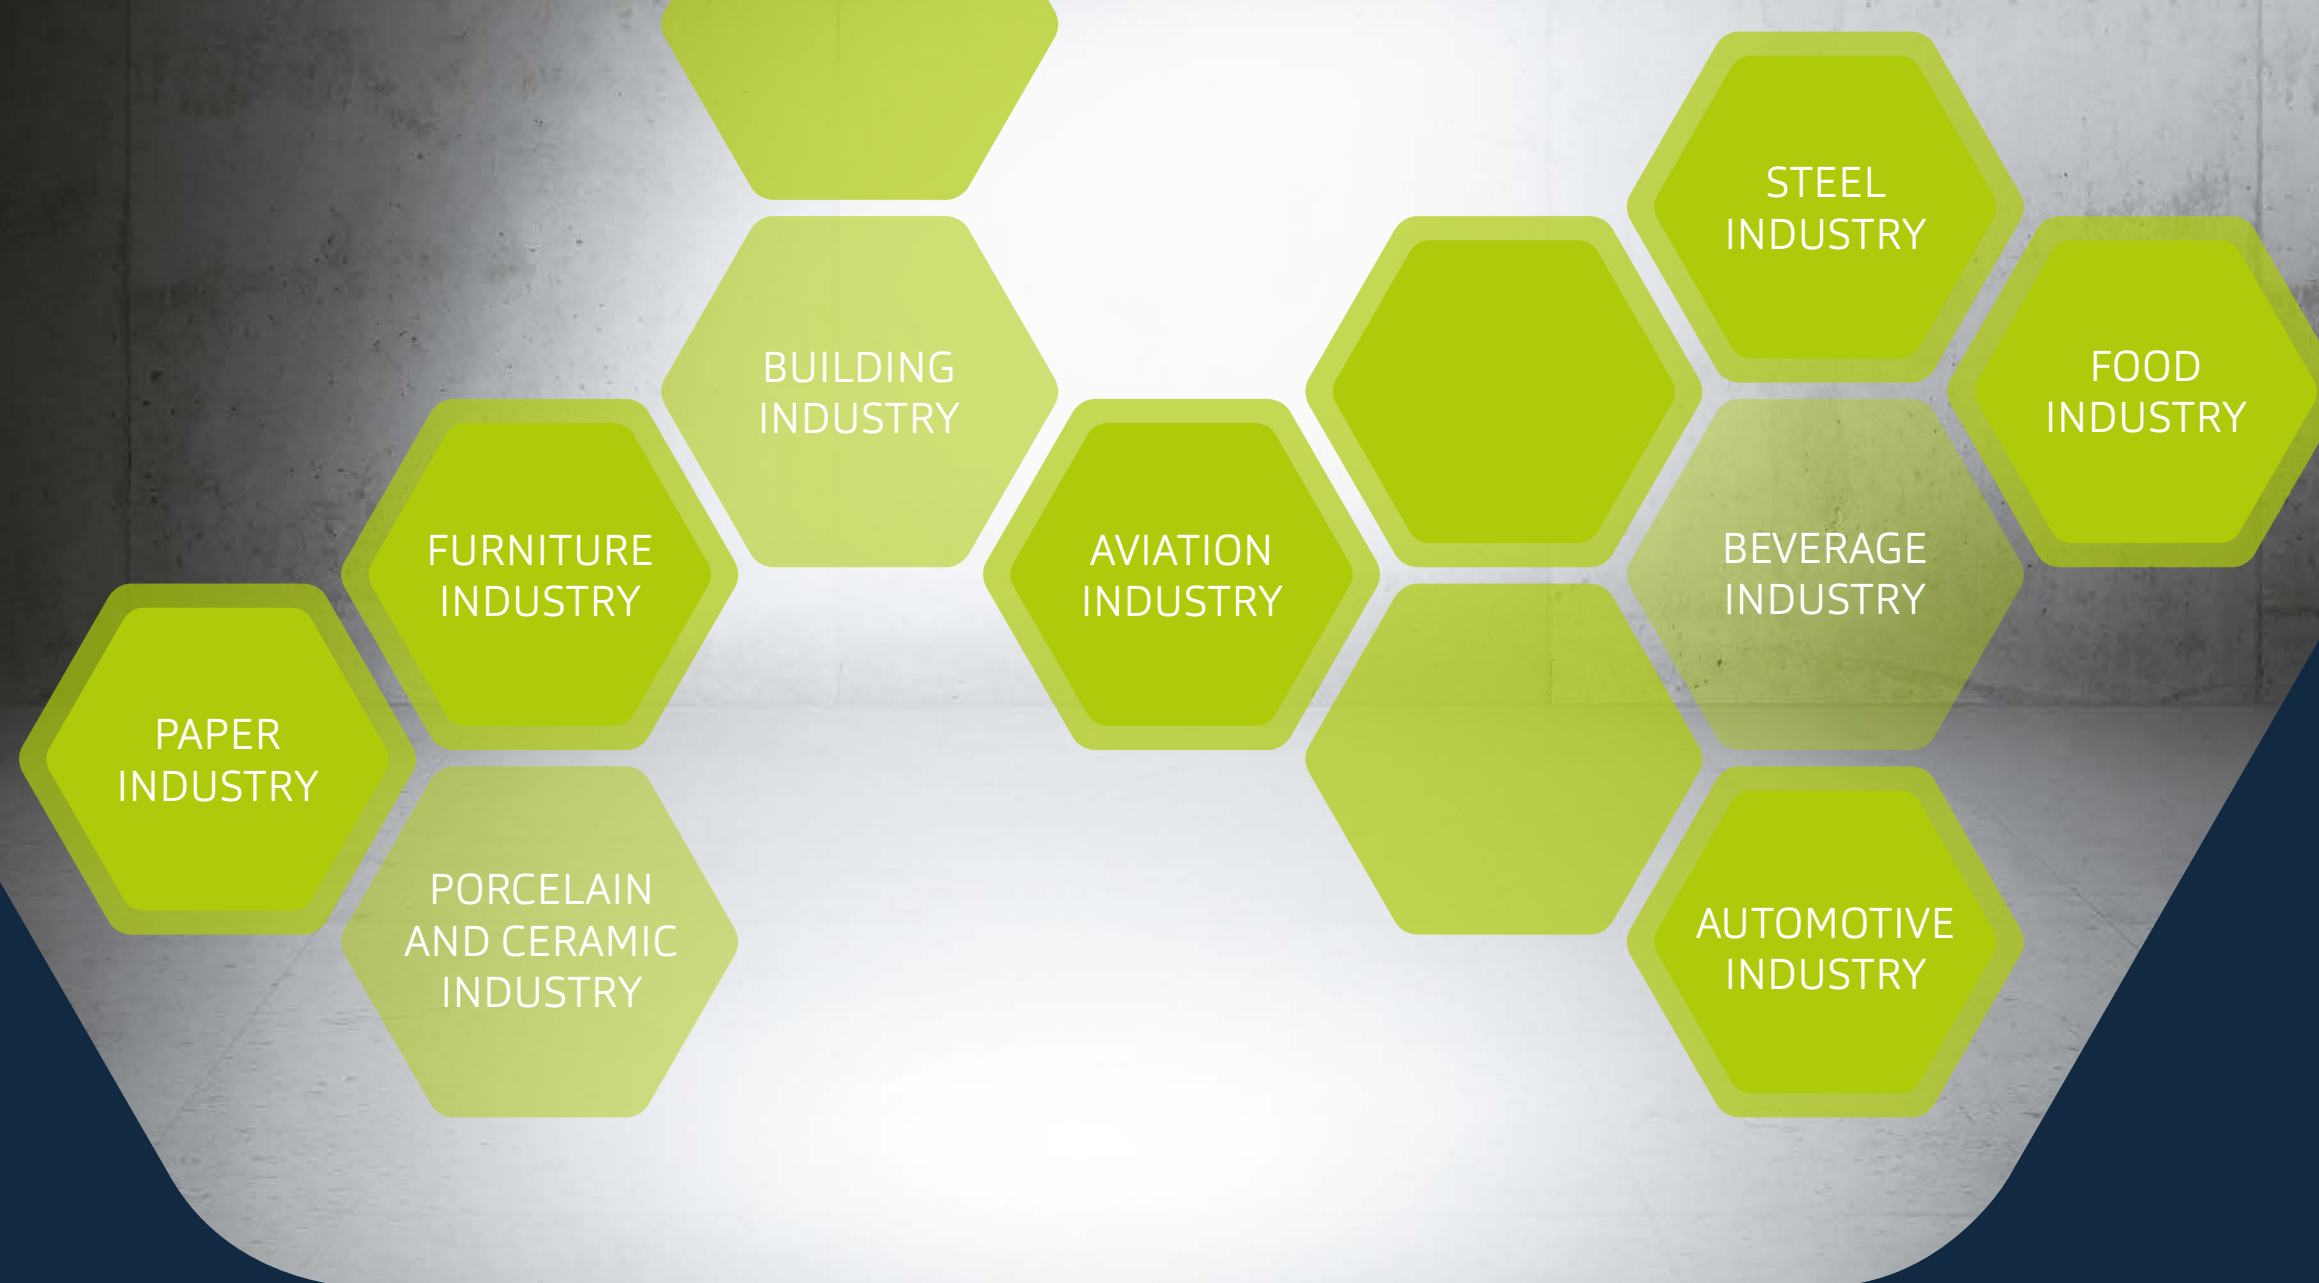

# CUSTOMIZED ENGINEERING MEETS CUSTOMER REQUIREMENTS.

Our in-house engineering department helps to develop turnkey solutions. They fit your individual requirements in different environments (cold

storage, handling of hot steel or similar) and under high stress conditions (e.g. 24/7 operation). We will deliver a finished product which can be integra-

ted into your system without a change of existing structures, equipment, or processes.

# CUSTOMIZED SOLUTIONS FOR MANY INDUSTRIES.

We develop and manufacture individual solutions for the handling of special load carriers, attachment devices for stacking and centering, or tilting and pivoting systems for testing purposes. Because of their mo-

dular design our products can be combined which gives them a competitive edge. Our range of customized applications is just as diverse as the industries in which they are used.

QUALITY  
MADE IN  
GERMANY.

SOLID  
PRODUCTS  
MOVE A LOT.

Telescopic forks

Rotating forks

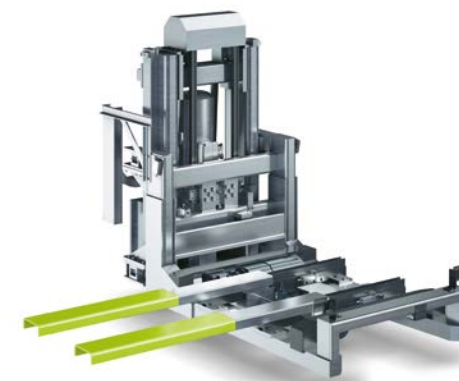

(Rotating) pushing forks

Eccentric lifting devices

Push-pull systems

Lifting and lowering devices

Transfer cars

We offer a broad range of products. We develop a variety of lifting devices for transport and conveyor systems covering loads from 20 kilograms to 50 tons. Our products may be

customized but they all have the same advantages: every product made by AFB is energy efficient, extremely solid and highly durable. This results in low maintenance costs for our

customers. Spare parts are available throughout the entire lifecycle of our products.

# QUICK, SIMPLE, AND PERFECT INTEGRATION INTO YOUR SYSTEM.

Implementing new equipment in the areas of production, conveyor and storage systems or distribution centers is often challenging. We develop and mount components which can

be specifically integrated in your already existing system. This way you have to change neither your product nor your material flow.

# COMPREHENSIVE SERVICE YOU CAN RELY ON.

We know that reliability and excellent service are key success factors. We offer on-site and in-house training sessions, maintenance operations and repairs. In the event of damage we guarantee at any time a

quick solution and minimum downtimes by providing direct personal contact, an emergency hotline, express deliveries and spare parts at fair prices.
